

PALLET PROCESS CONTROL 1.0 - PPC100

Heat Treating

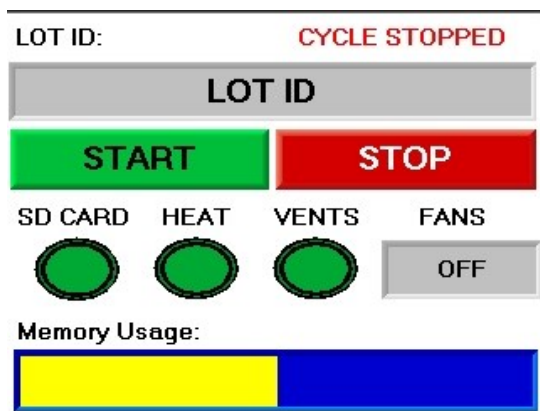

Nyle pallet process controller provided by Nyle Systems features a 3.5" touch screen control interface that monitors chamber temperatures, conditions, and pallet processing status.

Control comes preinstalled in 15 x 12 x 7 custom control box.

* 115 / 1 / 60—50 Power Supply Required

FEATURES:

1. On/Off controls for Heat, Ventilation, Forward and Reverse Circulation Fans
2. Control wiring is made easy with removable relay board and ribbon cable.
3. Meets all certification requirements for heat treating firewood by recording temperatures through out entire process.
4. Will store up to 500 different Cycles on single memory card. Works just like a digital camera. Pull the memory card out to print graphs on any windows based pc.
5. Includes one air temperature sensor and 3 wood probes w/ 75' lead wire attached
6. Press start button and walk away. Automatically goes into cool down cycle, and stops when total process has been completed.
