

NYLE CONTROLS

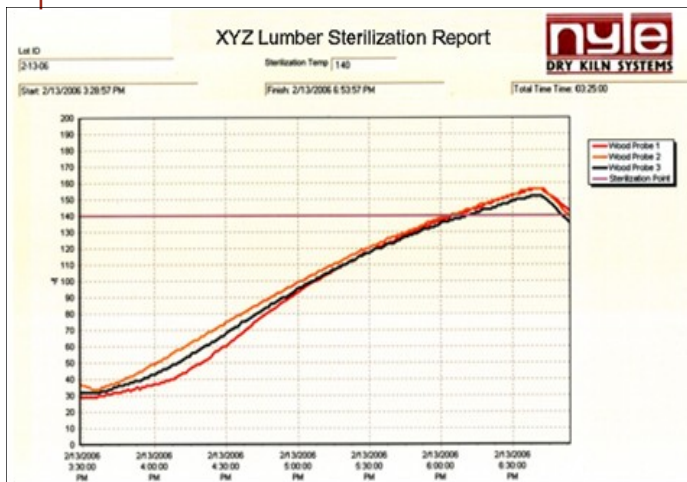

HEAT TREATING

Nyle Systems's Computer Control System provides the ability to collect data, control all heat treating functions and print necessary forms. Computer control system comes shipped in a customer server rack package with individual control boxes for each heat treating chamber.

- Heat Treat to required temperature
- Heat Treat your lumber for set amount of time required for certification
- Software prints out graphs for each load that has been treated
- Software saves every load that is run for later use or proof of certification
- Custom control operation available upon request
- Nyle provides 24/7 support to keep our customers running

GUARANTEED TO COMPLY WITH ALL CERTIFICATION REQUIREMENTS IN ANY COUNTRY.
