

NYLE VHT SERIES

DEHUMIDIFICATION DRYING OVER 210°F / 72°C

50,000 to 350,000 BF KILNS

The first dry kiln system that combines the advantages of dehumidification with the speed of conventional kilns. Developed by Nyle, the world leader in dehumidification drying technology. Nyle VHT kilns eliminate boilers and direct fired burners. Clean, environmentally responsible, economical to build and inexpensive to run. Why burn wood residues that can be sold at profit when drying needs can be met in a simple, clean, GREEN way.

Nyle dry kiln systems are made in a wide range of sizes to meet every need.

Nyle dry kiln systems are backed by Nyle's legendary customer support.

NYLE dry kiln systems are made in the USA by-
