

Nyle Container Kilns

Nyle Systems offers complete container kiln packages that combine our well-known, high quality L-Series drying systems with a 20 or 40 foot shipping container and everything else needed to make a top-quality drying kiln.

This package includes: dehumidifier, precision controls system, fans, heater, venting and assembly plans. Nyle Systems is happy to design, assemble and ship the entire container system to you but it is typically more economical to get a container, truss, baffles and duct locally and simply follow Nyle's assembly plans to make your kiln

Quality

Nyle Systems has been the world leader in lumber drying kilns for more than four decades. We use corrosion resistant aluminum giving our machines an extra long life and maximum energy efficiency. When you buy a kiln from Nyle you are not only getting the kiln, you are also receiving the famed Nyle Customer Support, which is rated to be the best in the business.

Nyle's Unmatched Experience

Through our more than 40 years in business we have gained a ton of experience in drying all types of lumber. Whether you're looking for a complete turn-key kiln system or for specific components, you have come to the right place. The Nyle team is committed to providing support with any questions, whether it's mechanical, electrical, or just how to get the best results from the drying process.

Our systems are designed and manufactured in-house from our facility in Brewer, Maine. Every system comes with service and support from the professionals who build them.
