

The world's first dehumidification dry system that can operate at up to

**250°F**

Drying dimension stock? Got a need for speed? VHT Systems are like HT but they dry hotter and faster. Made in a wide range of sizes to meet every need. Nyle VHT Dehumidifiers eliminate the need for boilers! Like all Nyle dehumidification systems, our VHT Series kilns are clean, environmentally responsible, offer flexible drying, are economical to build and inexpensive to run. They are easy to operate and are capable of drying using standard conventional schedules for softwood. Achieve top quality results with shorter drying times and incredible efficiency.

## Which model is right for you?

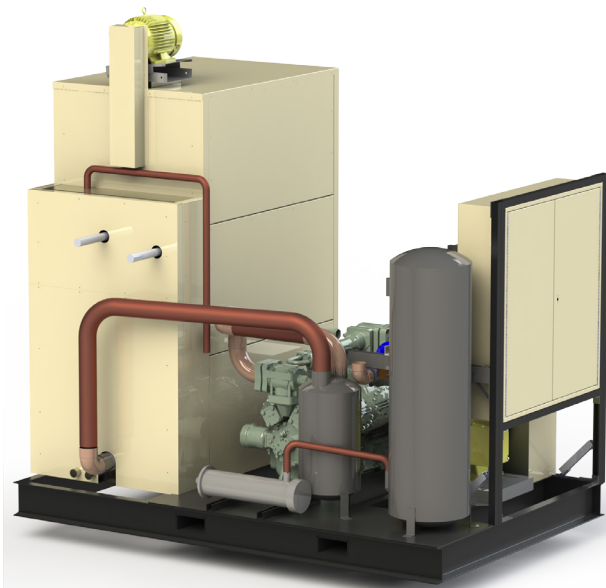

VHT Dehumidification kilns are made to order. Our expert sales representatives will select a base model and together with you, recommend a system to exactly suit your lumber drying needs.

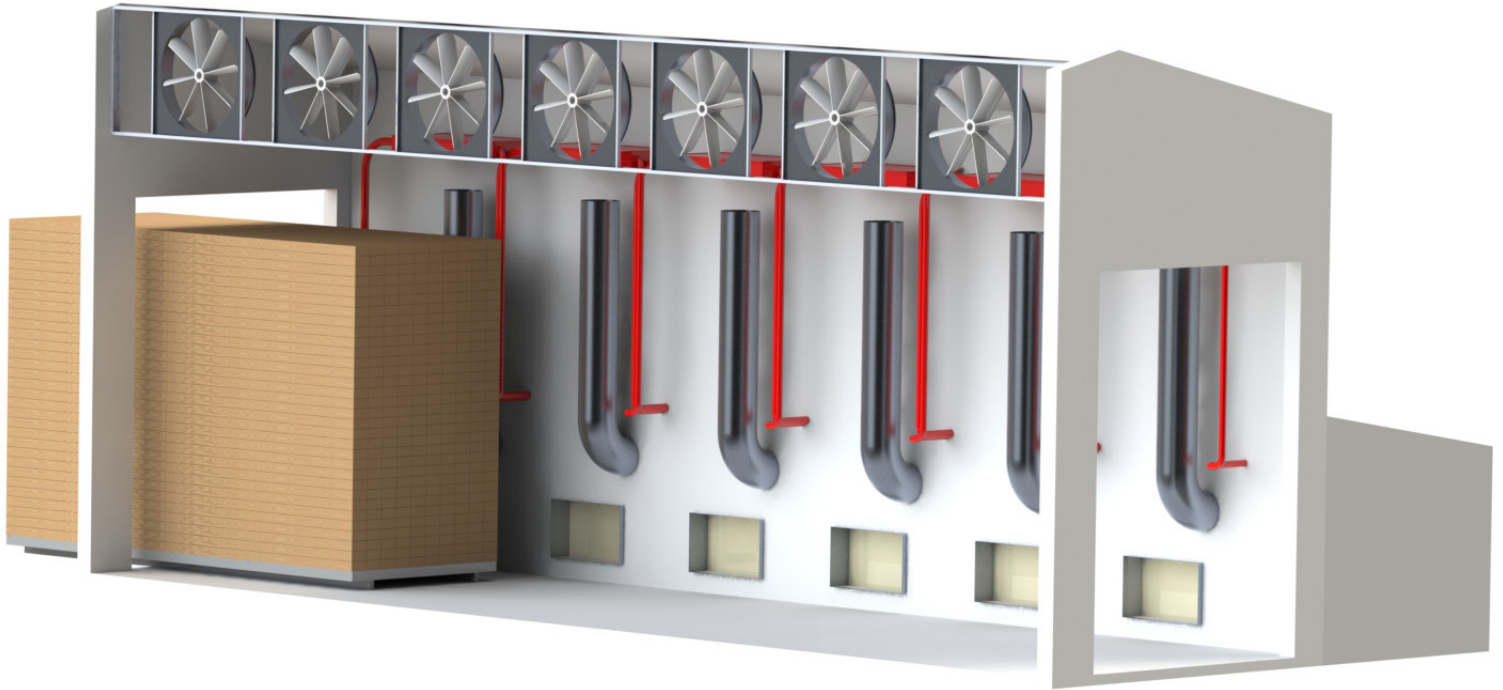

## VHT SYSTEMS ARE PATENTED

## VHT Benefits:

- Designed for loads of 50MBF to 1MMBF.
- Operates at up to 250°F (120°C), matching the speed of most conventional continuous kilns.
- Achieves top quality results with drying times equivalent, or faster than continuous kilns.
- Our heat pump technology maximizes energy efficiency by using 40% - 60% less energy than conventional kilns with a boiler.
- We use corrosion resistant aluminum cabinets and stainless steel dehumidification coils giving our machines an extra long life.
- Nyle's precision control systems with remote access from anywhere in the world.
- The famed Nyle customer support.

Questions? Call the Nyle experts for straight answers!

Our systems can be adapted to your existing chamber or we can build you a new chamber to suit your operation. VHT series kilns are all about customizing. We want to make sure that you have the system that works best for you, now and for years to come.

Nyle Systems continues to be the largest manufacturer of dehumidification drying systems in the world. Our dedicated sales and service representatives are committed to giving you the answers you need, whether you are looking into a new unit or if you have been operating a Nyle kiln for years. So, call or email us today and see what real customer service is all about.
